SKILLS

- Languages: C++, Python, Java, C, SQL
- Frameworks: TensorFlow, PyTorch, OpenCV, Scikit-Learn, Matplotlib
- Tools/Platforms: LangChain, HuggingFace, FastAPI, Seaborn, Google Colab
- Soft Skills: Problem-Solving Skill, Teamwork, Task Prioritization

PROJECTS

School ERP Management System | GitHub December 2025 - January 2026

- Built a full-stack School **ERP system** to automate student, staff, attendance, fees, and library management using Node.js, Express, and MongoDB.
- Developed RESTful APIs and optimized MongoDB queries to handle real-time school data efficiently.
- Improved system usability by designing responsive UI components using **HTML, CSS, Bootstrap, and JavaScript**.
- **Tech**: HTML, CSS, JavaScript, MongoDB, Node.js

Question Answering Gen-AI System-NLP | GitHub October 2025 - December 2025

- Design an intelligent **GenAI** powered Question–Answer System capable of answering user queries using a combination of LLMs, embeddings, and retrieval techniques.
- Built using a **Retrieval-Augmented Generation (RAG)** pipeline to pull accurate answers from custom documents, PDFs, or knowledge bases.
- Implemented semantic search to fetch the most relevant content before generating answers.

Tech: Python, LLMs, BERT, Vector DataBase, Transformer

Fake News Detection System | GitHub June 2025 – July 2025

- Developed a **fake news classification system** using **TF-IDF vectorization** and a **Logistic Regression model**, achieving high accuracy on real-world news datasets.
- Implemented a full **NLP preprocessing pipeline** including stopword removal, punctuation cleaning, and token normalization to improve model **performance**.
- Achieved **over 92% accuracy** and a strong **F1-score** on the Kaggle Fake vs Real News dataset.
- **Tech**: Python,scikit-learn,ML tools,numpy,pandas,streamlit

TRAINING

LOVELY PROFESSIONAL UNIVERSITY | Certificate June 2025 – July 2025

SOLVING REAL-WORLD PROBLEMS USING PYTHON :

- Completed hands-on training on AI & ML focusing on solving real-world problems using Python.
- Built ML models (**Logistic Regression, SVM, Random Forest, XGBoost, LSTM**) and improved accuracy through preprocessing and hyperparameter tuning.
- Developed real-world projects such as Fake News Detection, AI PDF Chatbot, Crop Yield Prediction, and Suspicious Activity Analysis.
- Gained experience in **NLP, Deep Learning (ANN, CNN)**, and structured ML pipelines (EDA preprocessing modeling deployment).

CERTIFICATES

- Essentials Automation Certification by **Automation Anywhere** | **Certificate** Nov 2025
- Certificate for completing all lesson and practice project in learn C++ by **CodeChef** | **Certificate** Sep 2024
- Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate certification | **Certificate** Aug 2025

ACHIEVEMENTS

- **Solved 1000+ coding problems across LeetCode , CodeChef, and Geeks For Geeks**: Dec 2025
  Built strong proficiency in DSA, algorithmic thinking, and problem decomposition through extensive multi-platform practice.
- **Selected as an LLM MATH Trainer at Outlier:** Oct 2024
  Enhanced AI alignment and reasoning reliability across core math domains.

EDUCATION

- **Lovely Professional University** Punjab, India
  Bachelor of Technology - Computer Science and Engineering (AI & ML Specialization) *Since August 2023*
  CGPA: 7.85
- **Radiant Central Children Academy** Jalalpur A.N, U.P
  Intermediate; ***Percentage: 76 %*** *April 2020 - March 2022*
- **Radiant Central Children Academy** Jalalpur A.N, U.P
  Matriculation; ***Percentage: 89.8 %*** *April 2019 - March 2020*
